The Tiger Juniors, a dandy junior team, yesterday proved their worth by defeating the Triangle Sport Club to the tune of 9 to 8. Croaman and Cline led in the hitting. Croaman also pitched a great game from start to finish. Errors are held accountable for all that the Triangles were able to get.

The transmission is of the selective sliding gear type, three speeds forward and one reverse. The universal joint is of standard Buick construction, being virtually an integral part of the transmission and automatically lubricated from the transmission. The clutch is of the multiple disc dry plate type, built in exact accordance with the principles which have guided clutch construction in Buick sixes. All moving driving parts are enclosed.

The third member is of standard Buick type of construction, designed successfully to eliminate all twisting or weaving in the rear axle. Gear ratio of the rear axle on high speed is 4 and 2-3 to 1.

Wheelbase of all models is 109 inches. The spring suspension is designed to give fine riding qualities to a car of this wheelbase. The front springs, semi-elliptic type, are 36 inches long, and the rear springs, also semi-elliptic, are 55 1-2 inches long.

Cord tires are standard equipment on all models. These tires, which are
